Doctrine

Agents propose. Laws decide. Owner signs. Receipts remember.
Product THESIS Platform v2.7.0
Network: monad-testnet

Daily brief (morning seatbelt)

You have operating equity ? 9995 USDC-eq and cash ? 9995. 100% appears idle. MON mark ? 1.016157. Day desk PnL 0.0. One idle-capital action may be worth reviewing.
? Equity ? 9994.94
? Cash ? 9994.99 (100% idle)
? Day PnL: 0.0
? Wallets linked: 18
? Sandbox twins: 3
? Gas: You pay the gas limit
? Constitution: liquid?30%, max protocol 20%, leverage OFF

Dual law stack (LawBook + owner constitution)

Runtime laws: 26
On-chain seed aligned: 25/25
Domains: ['system_self', 'monad_network', 'protocols', 'intelligence', 'execution']
Veto: sys.nomos-veto • Reject is a feature.

SovereignVault access

Deployed address: (not recorded ? run deploy or POST /deployment)
Execution: policy-gated • simulation first • owner signature required.
No silent broadcast (exec.no-silent-broadcast).

Ecosystem catalog

Tokens: 2
Infra notes: [{"id": "rpc", "name": "Public RPC", "mainnet": "https://rpc.monad.xyz", "testnet": "https://testnet-rpc.monad.xyz"}, {"id": "explorer", "name": "MonadVision", "mainnet": "https://monadvision.com", "testnet": "https://testnet.monadvision.com"}, {"id": "explorer2", "name": "Monadscan", "mainnet": "https://monadscan.com", "testnet":

"", "testnet": "https://testnet.monad.xyz"}, {"id": "docs", "name": "Monad docs",

Never invent addresses (monad.no-invent-addresses).

Trading desk

Equity: 9994.944575 • Cash USDC: 9994.9925
Day PnL: 0.0 • Paper mode: True
Arena: POST /desk/arena • REJECT is a feature.

Company OS / HQ

Pitch: THESIS gives one person a miniature DeFi company for Monad: research, compete
strategies, block unsafe actions, explain, execute with approval, and track the result.
Inbox items: 23
Workflow: SENSUS ? AGORA ? NOMOS ? MATHESIS ? PRAXIS ? ?

Daily loop

Level 2 • XP 280 • Streak 1
Missions: 5

Monad gas coach

You pay the gas limit: On Monad, $\text{gas_paid} = \text{gas_limit} \times \text{price}$. A huge MetaMask fallback
limit can overcharge you even if the tx is cheap.
Demo limit: 86000 (estimate 80000)

Agent / AI node (sovereign)

Node: None
Real key access: False
Sandbox only: True
Agent can open terminal tools + request PDF reports ? never keys.

Competition scorecard

Grade WINNER • 100% (14/14)
? Solves a personal problem (Spark prompt)
? Onchain path (SovereignVault / PolicyKernel)
? Live API (not vaporware)
? Reject is a feature (NOMOS / desk arena)
? Monad-specific gas doctrine

- ? Wallets public-only; AI no real keys
- ? Company OS departments + SLAs
- ? Real app packages in workspace
- ? Daily habit loop (XP/streak/missions)
- ? Public GitHub
- ? Explainability + teach as you use
- ? Focused shippable tools + MCP for any AI
- ? Dual stack deeper than allowlist-only agent wallets

Forged packages

72 workspace projects under projects/

Wallets (public only)

Linked: 18

Stores private keys: False

Generated by THESIS Platform • Owner remains sovereign • REJECT is a feature.
